Breezelets

One day last week one Carl Christianson, a Gleichen man, was "touched" by confidence men in Chicago for \$20,000.

A Calgary paper is curious to know where the Gleichen man got that \$20,000.

We presume, however, the Gleichen man is not worrying so much as where he got the \$20,000 as he is to know where the \$20,000 has gone to.

The trouble about sending the baseball players to the front is that they'd all be trying to "steal home."

Yes, but think of how they would put the other fellow out.

No, when "spring offensives" are spoken of, raw onions are not meant.

Perhaps those are strategic surrenders the Germans are making

Sending their men into France to help deplete the food supply.

"Judgment has been reserved in the gas case," says a Calgary paper.

We presume to give the political gas-bags a show till after the election.

Timely warning, boys: Keep out of the draft. You can do it by volunteering.

We'll believe that modern girls are in earnest in the matter of economy when we see them taking lessons from grand-ma in knitting and darning.

If they really think so much of the kaiser and have such absolute faith in him in Germany, just why are they now talking so seriously of limiting his power?

It's easy to talk about "drafting bachelors," but it's hard to land 'em. They're shy birds.

If the German people ever lose confidence in Hindenburg, the way to complete reform will be much easier travelling.

"Canada should wait till Germans arrive here," said Colonel Armand Lavergne, of Quebec.

Sure, then the gallant Colonel could join the German army.

Conscription

NOT A SURPRISE

FOR some time it has been a foregone conclusion with a very large percentage of the people of this country that sooner or later conscription would be adopted in Canada. Events have happened that has entirely altered circumstances. What was thought impossible to-day has been accomplished on the morrow. Two things which have recently happened have been factors in hastened conscription in the dominion—the gradual falling off of the voluntary system to practically nil and conscription by the United States. Besides the greater need of more men at the present critical juncture of the war. Other new factors are the increased submarine toll, the critical condition in Russia and the heavy casualties among the Canadian troops. The fighting divisions of Canada have been reinforced by Canadians besides for it will put a new spirit and a new heart in the Canadian army, and particularly those in the trenches to know that at last their own people are behind them. The government has done well to wait until the need for conscription became apparent to almost the whole people. It has done well to act now.

Nomination Day

THREE-CORNERED FIGHT IN ACADIA

Nomination of candidates for Provincial election takes place on Thursday next, May 31st. The constituency of Acadia seems destined to have a three cornered fight, unless one drops out, which does not seem likely. Anyway, as far as we can ascertain all three are elected, with substantial majorities, too—one to go to Edmonton and two to stay at home—but who's the lucky one?

Price of fire extinguishers goes up. Holy smoke!

The girl who marries a man because he's a good dancer may have trouble keeping him in step through life.

If the plan is adopted of prohibiting the manufacture of candy so that millions of pounds of sugar can be released for the Allies, the matinee girls' share in war sacrifices will be truly heroic.

The Municipal Hospitals Act

How to Incorporate a Hospital District and Provide for Operation of a Hospital

Under the Municipal Hospitals Act passed at the recent Session of the Legislature, the Minister of Municipal Affairs is authorized to divide the Province into Hospital Districts. He is also charged with the responsibility of supplying plans, specifications, estimates, advice on sites and management and such other assistance as he may be able to give. The bringing into existence of a hospital depends upon the initiative of the people. When only one municipality is concerned, all that is necessary to initiate action is a petition signed by twenty-five electors and agreed to by the municipal council. When more than one council is concerned the consent of the other council or councils is necessary, as well as the petition from the electors within the municipality. The preliminary work being done, the council shall appoint a hospital board. In the case of one municipality undertaking the work, the board shall consist of three members of the council and three electors outside the council. When there are two municipalities in the proposed district each council shall appoint three representatives, one being a member of the council, and two electors not councillors. When the appointments are made the names are sent to the Minister who names a convenor and the place and date of meeting for organization. The board has power—

To appoint such officials as may be necessary and to fix the amount of remuneration;

To determine the site and arrange for purchase of same;

To arrange for the acquiring or erection of a suitable building;

To make arrangements with any existing hospital, if preferred to undertake the establishment and maintenance of a separate institution;

To engage medical practitioners and nurses;

To arrange for financing the hospital, the preparation of estimates, etc., the municipality providing the money as for other municipal enterprises.

The levy for capital expenditure shall not be higher than two mills on the dollar.

As soon as the plans are approved by the Minister of Municipal Affairs, the council shall prepare a by-law for submission to the electors, which must be voted on within three months.

For full information as to how to arrange for and conduct a Municipal Hospital under this Act, apply to

JOHN PERRIE,
Deputy Minister of Municipal Affairs, Edmonton. [Adv't]

R. M. Sounding Creek

Minutes of meeting held in Youngstown, May 9th.

Present:—Councillors Hunter, Anderson, Gibbs, Fraser, Marcy, Cameron.

Minutes of previous meeting read and adopted.

Gibbs, that the offer of A. Westin for Road allowance Diversion on the N. W. 1/4 of Sec. 4-29-9 and removal of fence for \$125 be accepted.

Marcy, that J. K. Yeats be Road Foreman for the west half of the municipality at \$6.00 per working day.

Marcy, that we purchase from the Canada Iron Co. four two wheel scrapers for \$80.35 each, one fresno scraper for \$34.45 two road drags for \$33.25 each.

Amendment by J. A. Cameron, that the words two road drags at \$33.25 each be struck out of this resolution.

Amendment carried. Fraser, that the Treasurer issue a writ against J. Mullins under small debt act for taxes against the N. E. 21-31-8 6th M.

Marcy, that the petition for the forming of a Hospital District with the Sounding Creek, Golden Centre, Cereal and Collholme Municipalities be approved and forwarded to the Minister of Municipal Affairs.

Amended by Anderson, that these petitions be held in abeyance until we ascertain from the minister what municipalities we are grouped with.

Amendment carried.

Cameron, that wages for road-work for the current year be as follows: Single, man 35c. per hour, man and team 60c. per hour, man and four horses 90c. per hour

Fraser, that L. Proudfoot be appointed Auditor for the year 1917 at a salary of \$50.

Fraser, that the Treasurer apply to the Clerk of the Court to set a date for confirmation of the Tax Enforcement Roll.

Fraser, that the Reeve and Treasurer be authorized to borrow from the Bank of Commerce the sum of six thousand dollars as required being 60 per cent of the 1916 levy.

Fraser, that the Reeve and Treasurer be authorized to borrow from the Bank of Commerce the sum of \$270 on account of the Marby S.D. and \$600.00 on account of Ryerson S.D., being 75% of their respective demand for the current year.

GILLET'S YE

HAS NO EQUAL

It not only softens the water but doubles the cleansing power of soap, and makes everything sanitary and wholesome. REFUSE SUBSTITUTES.

The Human

Some Remarkable Facts About Eggs

And What They Contain

The latest research proves that 1,200 eggs hold all the chemical elements contained in a man weighing 150 pounds. This does not mean that if you make an enormous number of these 1,200 eggs a man would be produced. It does signify, however, that the elements in the eggs would be equal to the elements in a man.

If a person were to eat nothing but eggs he would get just the chemicals needed for supporting life, but the system would not digest an exclusive diet like this. The person trying to live on eggs alone would soon sicken, and if the diet were not changed, would die.

If an average man, weighing 150 pounds, were reduced to a fluid he would yield 3,650 cubic feet of fluid, containing gas and hydrogen, or enough to fill a balloon that would carry 155 pounds.

If the nominal body were taken just as it is and all of the elements extracted from it there would be found enough iron to make seven large nails; enough fat for fourteen pound candles; enough carbon to make the lead in 65 gross of pencils, and phosphorus enough to tip 820,000 matches. Besides all this would be found 20 teaspoonfuls of salt, 50 full-sized lumps of sugar and 28 quarts of water.

Thus it is evident that a human being is a great chemical factory, and the value of a man in actual materials is considerable.

The 100 dozen eggs would yield precisely the same quantities of these chemical elements, and even at the present high rate of eggs most of us would rather have the eggs used for the purpose than the man.

Change of Seed an Actual Injury

Will we ever learn that change of seed does not necessarily mean an improvement? Every experiment so far conducted has shown that a change produced a decreased tonnage and lowered quality when other factors were alike. One can easily see after a plant becomes adjusted to its soil and climatic conditions a change will require a readjustment.

There is an old saying that three moves are equal to a fire; that is, a person cannot be continually changing and not suffer loss.

The plant suffers as much as the human when we do not give it a chance to learn its environment.—Dean H. E. Cook, of New York State School of Agriculture.

A Modest Demand

The Lawyer.—Don't you think \$40 a week attorney is a little too much to demand when he's only making \$500?

The Lady.—No, I don't. That's what I used to make him gimme while I was livin' with him.

The Day of Reckoning

Why Germany Should Pay Indemnities to the Allies

Dr. Suedekum, of the militarist branch of the German socialist party, was his countrymen against believing that Great Britain had starved out in six months, but declares that this is not necessary for the German victory which is beset with indemnities. He says the socialists at least, recover their senses they will have to recognize with the rest of the world that if any indemnities are to be paid they ought to be paid by Germany: (1) for the unlawful injury done to Belgium as admitted by cabinet chancellor, who promised reparation; (2) for the malicious injury, with no military justification, done in occupied territory during the retreat; (3) for the criminal ill-treatment of the civil population; (4) for Zeppelin bombardments of unfortified towns remote from seats of war; (5) for the unlawful sinking of ships, neutral and belittled.—From the Springfield Republican.

Minard's Liniment Cures Burns, Etc.

Draft Horse Most Profitable

Men of Experience Claim That Draft Horses Are Best for Farmer

The use of draft stallions has been persistently advocated because that means the most money for the average farmer breeder. It is well understood by horsemen that draft horses and colts cost more to rear than light horses or light colts of corresponding ages. They are more easily confined less subject to accidents and more readily trained to work than light horses. Accordingly there is much difference in the cost of feeding colts of different classes. Most men of experience claim that draft horses may be somewhat more cheaply produced because they can safely be put to work a year younger. Many draft colts coming two years old are doing full work on oats, and are considerably larger than light colts at three years old, which is the earliest they usually begin farm work. The demand for draft horses is still unappeased. Anything with quality and in good condition, weighing 1,600 pounds or more, is selling as high as the trade has ever known, \$275 to \$300 per head being current prices.—Breeder's Gazette.

A Colored Story

"Your narrative is too highly colored," remarked the editor, returning the bulky manuscript.

"In what way?" inquired the disappointed author.

"Why," replied the editor, "in the very first chapter you make the hero turn purple with envy, the heroine turn white with anger, the hero turn red with blue with color."

An Oil of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of curative qualities of certain oils as applied to the human body. It is a rare combination and it won't and it can't be made in any other way. It will carry conviction to any who doubt its power to repair and heal.

Russia Releases Prisoners

Slavery in Siberia Is Now a Nightmare of the Past

One of the results of the Russian revolution has been the release of the political prisoners confined in the penal colonies of Siberia, and it is practically certain that these horrible pest holes will now be abandoned. Russian liberals have long demanded the abolition of the punishment of exiles for political crimes, and sought to bring about reforms in the conduct of the penal colonies for criminals, but so long as the old regime held power their appeals were vain.

Conditions at many of these penal camps have been horrible beyond description. Many of Russia's political prisoners have spent years in the Kara mines, dragging out a miserable and toilsome existence far underground, without ever being permitted to see the light of day. Other prison camps are located in the frozen wilderness within the Arctic Circle. Women revolutionists have been sent to prison camps where most of the convicts are of the criminal class, and have been left to the mercies of these savage men. This nightmare is now a thing of the past, for the new Russia has determined that the outrages of Siberia are at an end.

It was about two centuries ago that Peter the Great sent the first squad of political prisoners to the Siberian wilds, and since then thousands upon thousands of hapless victims of a despotic government have followed them. It is expected that large numbers of the political prisoners will remain in Siberia, and will thus help in developing the great agricultural and mineral resources of the country.

Russia's prisoners of war are principally confined in Siberia, and thousands of Germans and Austrians are now held there. Owing to the impossibility of escape except by flight into the wilderness where almost certain death would await them, these military prisoners are accorded a great deal of liberty. It is not at all improbable that a few of these will elect to remain in Siberia when the war is over, if permitted to do so by the Russian government.

Matrimony is the postgraduate course in a woman's education.

Boys for the Farms

It should be a matter of congratulation that so many Calgary boys in the public schools announce their desire to become farmers. The desire is not the exception in city schools of the east, where the tendency is to pass up the farm for some urban occupation. And the school board will be in good business if it makes moves to strengthen this good tendency on the part of this rising generation. In such a country as Alberta there should be at least as many city school boys graduate to the farms as pass into professional and industrial life.—Calgary Herald.

"Three moves are as bad as a fire." "Yep, and one visit of the paper hangers beats a cyclone."

A GOOD MEDICINE

FOR THE PRING

Do Not Use Harsh Purgatives—A Tonic Is All You Need

Not exactly sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite flicks, sometimes headaches, and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in spring is a tonic that will make new blood and build up the nerves. Dr. Williams' Pink Pills is the only medicine that can do this speedily, safely and surely. Every dose of this medicine makes new blood which clears the skin, strengthens the appetite, gives energy, lifts depression, men, women and children bright, active and strong. Mrs. Maude Bagg, London, Ontario, writes: "I can't hesitatingly recommend Dr. Williams' Pink Pills as a blood builder and tonic. I began using the Pills and a few boxes fully restored my health."

Indisputable Authority

The young husband laid down his piece of cake and regarded his wife across the table.

"Dearie," he began, diplomatically, "I suggest that there is something wrong in this cake."

"That's your imagination," said the wife, with a haughty smile.

"I made it exactly as set forth in the cookbook, and the cookbook says it's delicious."

Minard's Liniment Relieves Neuralgia.

Kitchen Waste

Finding the Secret of Economies in Food Values

More homes are wrecked from a financial point of view, from the waste of the kitchen, than any other cause. If, as Doctor Wiley estimates, one-third of our food is wasted, the thrift in food might be a very effective remedy for some of our present day domestic problems. With meats costing thirty cents a pound, and half bone and fat, eggs at five cents each, butter fifty cents a pound, and other things in proportion, we must do some readjusting if we would keep pace with the procession. You cannot increase your income half as fast as you can make it go farther. You need not do without porterhouse, but you can make it go a long way. Learn the secret of French thrift and find the secret of little economies in food values.

Liberty Worth Fighting For

Great Britain, after requiring her own manhood to join the colors, sends no soldiers to fight for alien nationality on her soil. This is a holy war. It will decide whether freedom is to persist or perish, and those who say they are coming to England in pursuit of liberty must be ready to fight for it and her.—London Daily Mail.

After 10 Years of Asthma Dr. J.D. Kellogg's Asthma Remedy proved the only relief for one grateful sufferer, and this cure among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness, is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Just Absent-Mindedness

An Irishman, having signed the pledge, was charged soon afterward with being drunk.

"It was absent-mindedness," said Pat, "an' I ain't no drinker."

"I said to meself, says I, 'Pat, come in an' have a drink.' 'No,' says I, 'I've sworn off.' Then I'll drink to you, says I, 'an' you kin wait outside,' says I. 'An' when meself cum out, faith, an' lo an' behold I'm in Pat's bar,' says I."—Pittsburgh Chronicle-Telegraph.

The Briton a Splendid Fighter

The Briton has discovered in himself many qualities which have hitherto been dormant. He is a splendid fighter, equal, if not superior to the professional soldier of bygone days, whom Marshal Bugeaud described as the best in the world. He has acquired a liking for fighting and danger, and is keen to show (both to us, whom he admires, and to the German, whom he cordially detests) that nothing terrifies him. If anything, he is too daring.—Figaro (Paris).

"Ma," said a discouraged little urchin, "I ain't going to school any more."

"Why, dear?" tenderly inquired his mother.

"Cause 'tain't no use. I can never learn to spell. The teacher keeps changing words on me all the time."—Occident.

SPORN MEDICAL CO. Goshen, Ind., U. S. A.

Arsenical Fly Poison

Rated as Dangerous

United States Government Issues Warning on the Peril of Fly Poison

Dr. Ernest A. Sweet, passed Assistant Surgeon, United States Public Health Service, is the author of a government health bulletin on "Transmission of Disease by Flies," which contains a timely warning on the dangers of arsenical fly poison.

Dr. Sweet considers their use a menace which threatens every home. That the fly poison peril is a real one is proved by the fact that the American Press has recorded 106 child poisonings cases in the last three years.

Dr. Sweet advises his readers to destroy flies some other way than with arsenical fly poison. He says, "Of other fly poisons mentioned, mention should be made, for the purpose of condemnation, of those compounds of arsenic. Fatal cases of poisoning of children through the use of such compounds are far too frequent, and owing to the resemblance of arsenical poisoning to summer diarrhoea and cholera infantum, we believe that the cases reported do not, by any means, comprise the total. Arsenical fly destroying devices must, therefore, be rated as extremely dangerous and should never be used, even if other measures are not at hand."

Minard's Liniment Co., Limited.

Gentlemen,—I had my leg badly hurt, the pain was very severe and large swelling came above the knee. I expected it would be serious—I rubbed it with MINARD'S LINIMENT, which stopped the pain and reduced the swelling very quickly. I cannot speak too highly of MINARD'S LINIMENT.

AMOS T. SMITH.

Port Hood Island.

Assist Our Basic Industry

What Happens to Agricultural College Students

An interesting registration scheme recently conducted by President Keynolds of the Manitoba Agricultural College at Winnipeg, to ascertain what agricultural students do when they leave college. The results that he has obtained from those at present enrolled in that institution show that 38 girls out of 83 will go to their parents' farms or the summer, 7 will take out farm work, 5 will go as housekeepers, 3 will go to nursing, 2 to nursing office work, and one dress-making, 25 not having reported.

The male students 52 out of 122 will go to their parents' farms and work, 32 will go to their own farms, 2 to creamery work, 6 are willing to work on their own. It is not yet placed, and 30 are not yet heard from.

MONEY ORDERS

Pay your out of town accounts by Dominion Express Money Orders. Five dollars each three cents.

Measure for Measure

The enemy must be met with measure for measure. Victory is a desperate victory; and we shall not get it undeserved. Germany, we know, has prepared to put the last ounce of her strength into this year's campaign; she is staking everything. Disaster in the coming months will be for her utterly irreparable; she will be stripped of all reserves of power, and must go down. But to inflict such disaster we must bring all our strength to bear; we shall have to deal with efforts more desperate than the enemy has yet put forth, for his only policy now is to "let everything go." That policy we shall meet and shatter if the nation maintains its determined purpose to face every sacrifice, and if the government may call.—London Daily Telegraph.

What You Surely Need

is a healthy, active, industrious liver. Small doses, taken regularly, insure that.

Maybe You Need a purgative sometimes. Then take one larger dose.

Keep that in mind; it will pay you rich dividends in Health and Happiness.

Letter From Major Rideout

The following interesting letter
which is dated from London,
England, has just been received
from Major Rideout:

I was looking over my Coy.
roll to-day and find I only have
two of the old 175 men left.
There is not a doz. left in the Bar.
who are in training. All are in
France, or will bet by the end
of this week. Mack McColi, F.
Goe, also Lorne Bethune, H.
Vincent go this time. There was
a call for 11 officers as soon as
Vimy Ridge was taken. I tried
to go but the honors went to
another Reserve here. So I will
be in England a while yet; but
from now on we don't know how
soon they can use us. We have
not heard yet if any of the 175th
men were plugged at Vimy. Tell
my English people there never
to come to England to live.
We had snow 31 days without a
break in March and April and
rain ever, since. Sunday was a
lovely day but we had both snow
and rain. We have been expect-
ing summer to start for nearly a
month but not yet. I got over
to France for eighteen days last
month. Had a good trip. Was
at Boulogne, Amiens, Rouen
and Le Harve. Liked France
fine and the weather was good
and spring-like, more so than
here. I had permission to go to
the firing line, but that was not
good enough for the O. C. in
Harve. It took me a week to get

over and two-and-half days to get
back, a trip that should be made
in peace times in a day or two. I
saw war material, prisoners, etc.,
too numerous to mention. The
French people are working the
latter everywhere. The French
are very optimistic, they all ex-
pect the war to be finish by Oct.
at latest. My own opinion
changes from time to time, so I
won't give it, as it might have
changed before this reaches you.
When in Le Harve we put some
sick soldiers from Salonika on
board the hospital ship "Gloucester
Castle," lately sunk by the
Huns. She was a pretty boat,
painted white, with a green strip
and the Red Cross on her sides.
The food question is somewhat
troublesome here at present, but
they are going to pull through
till the new harvest, especially
as U.S. has come into the war.
She will help convey foods as
well as munitions. Potatoes are
the only thing we are short of
and we get them three or four
times a week. Every acre of land
that can be planted or sown this
year should be done. This part
of England is very pretty and
summer-like and the trees are in
leaf. Every officer of my old
Coy in the 175th has offered to
go to on draft, two of us to revert
to Lieut. Two already are in
France. They will need us all
between now and Fall, if they
run up against many Vimy Ridges.
I talked with a few of the
boys who left there since the
drive started. They are very in-
teresting. Lt. Jack Sully is in

the flying corps now in France.
He got a bump a few days ago.
He landed too fast and cut his
jaw slightly. Three of the 175th
officers are flying now and three
or four going this week. We
shall be well represented in this
branch of the service. My brother
was through the late fighting, am
expecting an account of it from
him any day. I hear Chinook is
growing daily, may it continue.
I hope soon to come back.
G. Stacey is in Witley Camp now
Venables and Cleverly are here
yet. These boys have grown to
to quite men now. All are get-
ting on well.

LOST, in Chinook, a brown
Bill-book, containing a U. S. two
dollar bill, and perhaps some sil-
ver. Reward given. Leave at
Chinook Garage.

W. V. NEWSON,

Deputy Provincial Treasurer
Edmonton

To the Electors of the Constituency of Acadia

LADIES AND GENTLEMEN,

Having been nominated by a representative Convention of the Electors of this Constituency as an Independent Candidate for the coming Provincial Election, I take this opportunity of soliciting your vote, influence and hearty support.

The recent revelations in Manitoba, Saskatchewan and British Columbia are irrefutable proof of the corruption in the Governments of those Provinces caused by "blind partizanship," and there are already more than rumors in the air that the same is only too true of Alberta. The spirit of the times demands that the men who are to assume the reins of Government in this and every other part of the world shall be men of principle, men of an independent mind, rather than blind Party followers.

If elected, it shall be my earnest endeavor to do all in my power to help establish a clean, honest administration of the affairs of the Province, an administration that shall be freed from all the evils of the patronage system and other weaknesses developed and maintained by the blind partizanship of the men elected in the past to our different Legislative Assemblies.

On behalf of my supporters, among whom are some of the best men and women of the Constituency, I again solicit your support, trusting that our efforts to establish a higher standard of government and of citizenship in the Province shall not be in vain.

Yours sincerely,

LORNE PROUDFOOT

We, as Independent Electors of this Constituency stand for—

1. The Abolition of the Patronage System.

2. The appointment of all civil servants by merit, rather than by political pull.

3. That there shall be full publicity of all political campaign funds and contributions and their expenditure, both before and after election.

4. The Right to Re-Call any member of the Provincial Legislature.

5. The Initiative and Referendum

6. Full provincial autonomy in liquor legislation, including manufacture, import and export

7. Government Ownership and Control of Railroads, Telegraphs, Telephones, Steamship Lines, and all other means of public transportation and communication.

8. No more natural resources to be alienated from the Crown, but brought into use only under short term leases

in which the interests of the public shall be properly safe-guarded, such leases to be granted only by public auction.

9. Women to be given equal rights with men under our homestead regulations.

10. Candidate chosen by this Convention, if elected, to forward to the newspapers of the Constituency a weekly report of the session.

It was our purpose to visit every town and rural community to discuss these questions with you, but the Sirfup Administration by bringing on the election with such short notice has made it impossible for us to do so. Why should they put the Province to the expense of an election almost a year before such election is necessary? And why should they deny to the electors of this and every other Constituency in the Province the opportunity of making themselves familiar with the issues at stake? These are questions which each Elector must answer. We leave it in your hands.

Meetings to discuss Political Issues will be held in Rainbow School, Monday Evening, May 28th
Heathdale School, Tuesday Evening, May 29th
Buzard's Hall, Cereal, Wednesday Evening, May 30th
Youngstown, Friday Evening, June 1st

Some meetings will be held at other places, dates to be announced later.
These meetings will be addressed by Mr. Lorne Proudfoot, Independent Candidate; Mr. R. N. Mangles, President of Ind. Assoc.; Mr. R. C. Fraser, Vice-Pres.; Mr. Robt. Gardiner, Member of the Executive; and others.
Meetings begin at 8 o'clock sharp. All are invited to attend—a special invitation being extended to opposing candidates.

N. F. MARCY, Chinook

SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Land Agency (but not Sub-Agency), on certain conditions.

Duties—Six month residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required, except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties—Six month residence in each of six years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$300.00.

The area of cultivation is subject to reduction in case of rough, rocky or stony land. Live stock may be substituted for cultivation under certain conditions.

Chinook Breezes

Another Victoria Day is here.

What about Chinook's sport
day, which usually comes along
in June?

Urch—At Chinook, on Sunday
the 19th inst. to Mr. and Mrs.
Urch, a daughter.

Bowling seems to be a very
popular amusement in Chinook
at the present time.

Mr. Alex. Thomas of Ontario
will spend the Summer with his
cousin, Mrs. R. W. Whelan.

The Advance is just settled in
its new quarters, one door south
of the Chinook Garage—minus
tee fixing up.

Among the new houses that
are being built is that of Mr. A.
Wilson on Second Ave. West
and Mr. Boyer, sr. on Fourth
Ave. West.

Was Some Run

An exciting runaway occurred
on Monday when a team attached
to a wagon, took a sudden sprint
along Main street north, finish-
ing up in an ally, with one wheel
and the tongue and harness.

All Set for a Bumper

Seeding is pretty well over in
this district. There is a far
greater increase in area seeded
this year—the largest in its his-
tory. Given a good crop—well,
a large percentage of the farmers
will be very much on easy street
—and then some.

Chinook Takes a Jump

Chinook has taken a big jump
in all lines of buildings and
business this spring. We think
Mr. J. L. Carter of the Acadia
hotel deserves the credit of start-
ing the ball rolling when he took
possession of the hotel, and with
the erection of the additional 27
rooms to that building.

Rearville to Celebrate

Posters are out for Rearville's
sports day, which takes place on
Friday, June 1st. A very attrac-
tive program of sports, &c., with
a dance in the evening, has been
arranged, and if given suitable
weather, a pleasant time is assur-
ed. So make your arrangements
accordingly and be there.

It Was a Corker, Susie !

The baseball season was open-
ed in Chinook last Friday even-
ing, when a friendly game was
played between Youngstown and
the home team, and, oh, Susie!
the visitors did Chinook up brown.
We only barely saved a white-
washing by getting two runs in
the last innings. Never mind,
our boys are all right, and we ex-
pect they will give a good account
of themselves before the season
is over, so look out, Youngstown.

Are Getting Better

The weekly Red Cross tea last
week which was given by Mrs.
Woodruff and Mrs. Oxley, was a
great success, notwithstanding
the unpropitious weather, which
somehow was discouraging to
the ladies in charge. The
collection amounted to \$16.00.
The tea which was given the
previous week, by Mrs. Miller
and Mrs. Nicholson, amounted
to \$14.30.

Will Be a Credit to Chinook

Mr. J. R. Miller has decided
to build a store on lots 1 and 2,
block 1, which takes in the lot of
his old site and the lot next south.
The store will be 40 by 60, with
provisions being made for a
second storey to be built at a
later date. Excavation for a
large basement has been com-
menced, with cement and brick
fire walls, and a large staff of
men will be engaged to rush the
work to as early a completion as
possible. When completed it
will be one of the best and most
commodious stores along this line.
